Paint Brush Care:

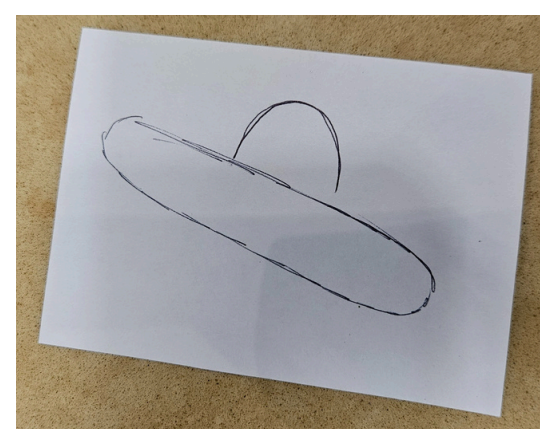

Clean your paint brushes with warm water and wipe off on a paper towel. Clean your brush in-between each step.

Spaceship!

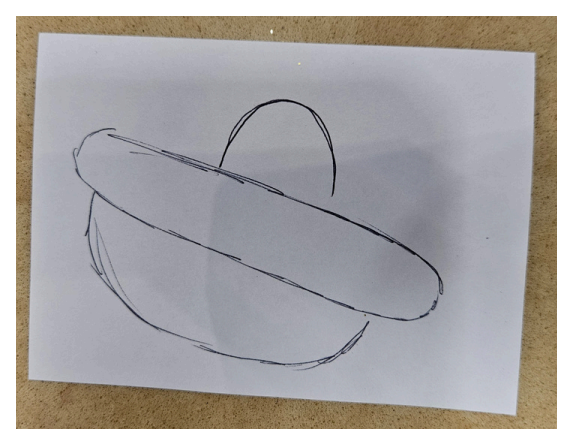

1

Paint a long, slightly curved rectangle.

2

Paint a half circle on top of the rectangle.

3

Paint a small circle on top of the half circle.

Step 3 (Spaceship): Paint your spaceship grey. (See picture 3)

Step 4 (Stars): Paint your stars yellow. Add a few white and yellow dots to create tiny stars! (See picture 4)

Step 5 (Spaceship): Paint the top/window of the spaceship blue.

Step 6 (Sun): Paint the sun orange. (See pictures 6 & 8)

Step 7: While the orange paint is still wet, paint a red ring around the sun. Move your brush back and fourth to blend the colors together. (See pictures 6 & 8)

Step 8 (Planets): Paint your 3 planets a color - we used blue, red, and green.

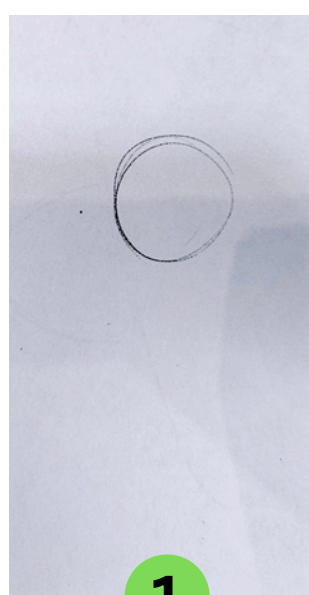

Step 9: While your planets are still wet, paint a ring around the planet using a darker color. For example, we painted the planet blue and then painted a purple ring around it. While the paint is still wet, swirl your brush until the colors start to blend together. (See pictures 8-10)

Step 10 (Shooting star): Paint your comet orange and give it a yellow tail. Swirl the colors to really blend them together. (See pictures 6-8)

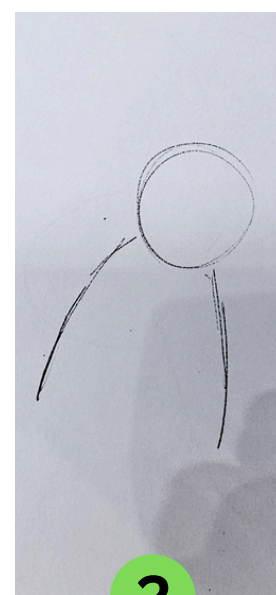

Step 11: Accessorize your spaceship! Paint small dots around the edge of the spaceship and/or lines! Have fun with it! (See picture 10)

Step 12: Paint an alien inside of the spaceship. (See picture 11 and/or tutorial below!)
